Lining: BreathActive functional lining
Footbed: evercushion® MISS
Sole: rubber sole MISS SAFETY MOTION with Torsion Control System, 300°C heat resistant
Sizes/Width: 35 - 42 / F

Rubber Outsole

This 300°C heat resistant HRO rubber sole is inspired by the latest running technology. The sole profile ensures a perfect flexibility and a secure contact to the ground.

Upper

We use innovative materials to combine a superior comfort with the best performance.

FAP® flexible anti penetration

A flexible mesh of ceramic coated fibres protect your feet against penetration. And it's lighter than steel.

EVA Midsole

We injected billions of tiny bubbles in this ultra lightweight midsole for an optimal cushioning and an improved flexing action of the foot.

evercushion® MISS

This anatomically designed lightweight footbed with waffle structure will keep you cool and dry by transmitting moisture away from the foot in wear. The open cells also allow for rapid drying when the shoes are removed

Torsion Control Element

Our TPU Torsion control system in the waist of the sole provides you with a better support and stability.
